PROJECTS

Weather App(Flutter) |

Jan 2021 - Mar 2021

Designed a beautiful Flutter weather application. Entirely written in Dart and Flutter. The application is ready to install in Android and iOS.

- Used **Openweather.org API**
- **Current weather:** current temperature, max and min temperature, humidity, pressure, wind
- **Weather forecast for 5 days** (temperature, wind, rain and pressure)
- Sun/moon **animation**
- Automatically picks user **location** (also error handling when location can't be selected!)
- **Works offline** (user need to download the data)
- Persist location and weather data in local storage
- **1000+ Installations** on Google Play Store

SpaceX Lunch Program App(Flutter) |

Mar 2021 - Jun 2021

A Flutter app to collect most essential information about all SpaceX-related, from lunches to vehicles.

- All the data from the open-source **r/SpaceX REST API**
- **Launch tracking & details:** a detailed list of past & upcoming launches
- **Notifications support:** be notify before the rocket leaves the launch pad.
- **Vehicle catalog:** read about all rockets, capsules & ships SpaceX has developed over the years.
- **Ships tracker:** tells position, speed & status of all active ships used by SpaceX
